Explore the Mercedes-Benz all-electric truck range with Midlands Truck and Van

Midlands Truck and Van, the approved Mercedes-Benz and FUSO Commercial vehicle dealer, representing the West Midlands, are proud to be exhibiting the eTruck range at the Commercial Vehicle Show - NEC which runs from **23rd - 25th April 2024**.

On their stand you will be able to get hands on with the all new eActros and eCanter and they will also be offering an outdoor driving experience around the NEC in the eActros with Truck Training Manager Chris Round.

The eActros comes with the new efficient Mercedes-Benz eAxe, delivering a continuous output of 330 kW and maximum output of 400 kW to provide immediate and powerful acceleration. This incredible driving experience is supported by a two-speed transmission and a low centre of gravity.

Part of the integrated eActros solution package includes new eConsulting

and innovative digital solutions, fully supporting your transition into the world of all-electric trucks, all bringing us closer to the target of zero emissions.

With the eActros, filling stations are replaced by charging stations! Thanks to a battery capacity of up to 448 kWh, the eActros has a range of up to 400 km. With a charging capacity of 160 kW the eActros charges from 20 to 80 % in just over an hour (with three batteries) and in around an hour and a half (with four batteries) with DC fast charging. The standardised charging system makes charging as intuitive as possible, simply apply the handbrake, connect the plug to the vehicles charge socket and the charging process begins.

At the Commercial Vehicle Show, Midlands Truck and Van are excited to also be exhibiting an all-electric answer to the challenge of zero emission city centre deliveries – the Fuso eCanter. With 38 configurable variants,

whatever your requirement, the Fuso eCanter will fit the bill.

The 38 variants are made up of 3 weight classes, 6 wheelbases, 2 cab types and 3 battery options, S = 41.3kW, M = 82.6kW and L = 123.9kW which offers a range of 70km to 200km. With a body/payload allowance of up to 5,155kg with the 8.55 tonne variant, this sturdy all-purpose truck is a real workhorse. Optional factory dropside & tipper bodies are available, but we can also provide more bespoke solutions which can also be equipped with mechanical power take-offs.

To find out more, and explore the range of eActros and eCanter trucks visit Midlands Truck and Van on **Stand 5A70** in the Truck Zone at the Commercial Vehicle Show
