

Basic Connectivity.

Mercedes-Benz  
Trucks you can trust

# Free telematics at your fingertips.

Connect simply and swiftly to your fleet data.

The Fleetboard Manager App is our free Basic Connectivity solution. It delivers detailed information on your Mercedes-Benz Truck's performance and location, delivered directly from the Truck Data Centre installed in your vehicle. Our app is available on both Apple and Android platforms, is free to download and use, and offers invaluable insight to your fleet's performance, however many Mercedes-Benz vehicles you operate.

Download Fleetboard Manager for free by tapping the buttons below.

Whether you're familiar with telematics or not, you'll find Fleetboard Manager an important and intuitive resource.

# Basic Connectivity.

When you're considering purchasing a new Mercedes-Benz, it's good to know our telematics are at the heart of our trucks, giving you free access to Basic Connectivity. This means you have access to your vehicle's position, up-to-date vehicle status and additional fleet information, so we're confident Fleetboard Manager offers a big advantage to our customers.

# Fleetboard Manager features.

Once you have the app, and complete a simple free of charge contract, our secure portal will give you at-a-glance data for all connected vehicles. Use the dashboard to view potential savings as a percentage of your operation and in actual monetary terms. You'll be able to map the positions of your vehicles and see the mileage details of the current and previous week – alongside fuel consumption.

App users will also be able to gain an understanding of their vehicle's CO<sub>2</sub> emissions and preview Mercedes-Benz Uptime.

# Good for business. Good to go.

## CO<sub>2</sub>

Indication of your fleet's CO<sub>2</sub> emissions.

## Mileage

Weekly overview of your fleet's mileage as well as insights of the highest and lowest mileage.

## Basic performance analysis

Indications on the driving behaviour of your drivers and if fuel efficiency can be improved.

## Consumption

Compare drive and idle consumption of your trucks.

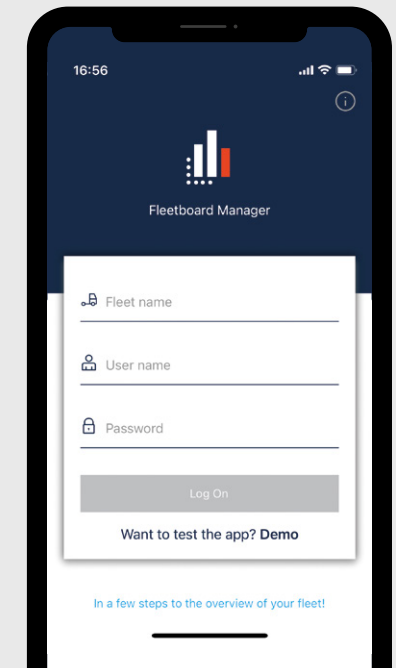

## Vehicle position

Transparency regarding your vehicle's position.

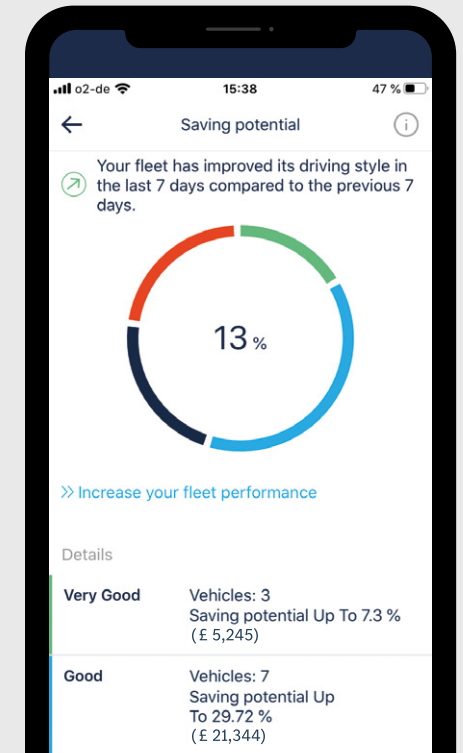

## Maintenance measures

Information on vehicle status and maintenance data.

# Savings potential.

Fleetboard Manager shows the savings potential\* which could be achieved by improving individual driving styles.

By evaluating and training drivers with lower scores, specific savings could be achieved – and safety improved.

\*Calculated over 12 months with 120,000 km per vehicle and £1.20/l.

# Mileage.

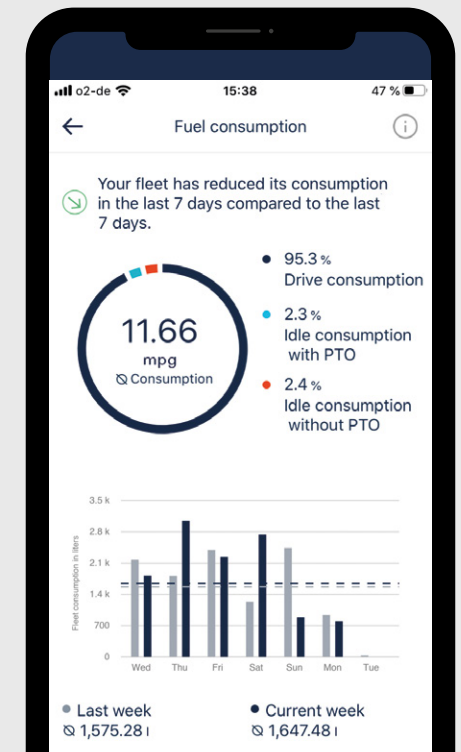

Compare average mileage (or kilometres) of your fleet for the current week versus the previous week.

You'll also be able to see the individual vehicles with the highest and lowest mileage, all in one place.

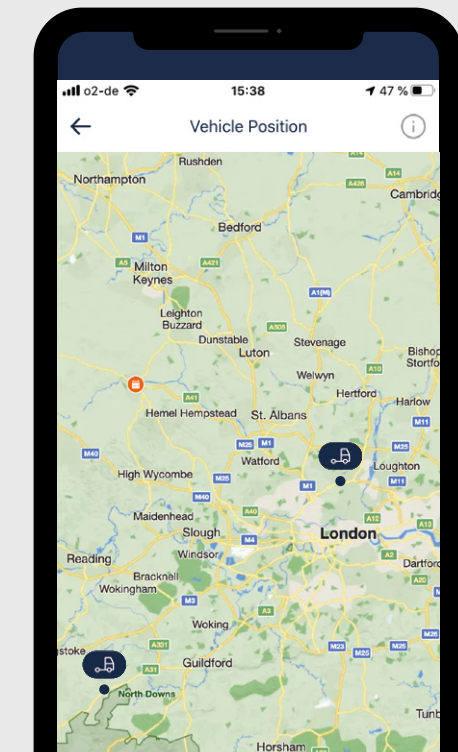

# Fuel consumption.

This feature compares how many litres of fuel your fleet has consumed in the current week compared to the previous week.

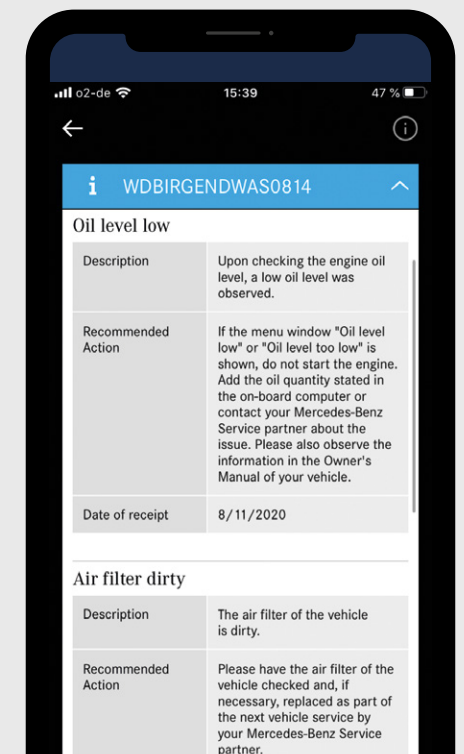

You can also view day by day comparisons and see potential savings via the driving consumption cluster which analyses driving, idling and power take-off.

# Vehicle tracking.

Receive regular updates of the last geographical position of your vehicles. Depending on the ignition status of the individual vehicle you will be able to accurately map it's last known location as regularly as every 10 minutes.

# Uptime preview.

The free Fleetboard Manager offers an insight into the invaluable Mercedes-Benz Uptime feature. This preview version shows the current status of the vehicle and flags upcoming maintenance measures.

The full version of Uptime is available to all customers who have a service or ISP contract. This preview illustrates the value it provides by anticipating potential issues and minimising downtime.

## Get on board.

We're excited about bringing free telematics to all our customers and providing the data which could deliver extra economy, safety and troubleshooting. We'd love to have you on board, so if you have any questions don't hesitate to contact your local Dealer.
