

TRUCKLIVE.

Your simple and free introduction to the digital service world of Mercedes-Benz Trucks with Midlands Truck & Van

Instant Connection.

TruckLive is your easy entry into the digital service world of Mercedes-Benz Trucks. Now get access to extensive digital service components free of charge immediately after signing a contract and registering your new vehicle via My TruckPoint for Mercedes-Benz Trucks or for the duration of a paid service or Fleetboard contract for your vehicle. Benefit from efficient maintenance management and dynamic route guidance, among other things, as well as all other planned services from TruckLive.

Shorter workshop downtimes.

Your vehicle sends you and your service partner up-to-date maintenance intervals forecasts for optimised maintenance scheduling.

Always up-to-date.

Event messages help you to react quickly to necessary repair measures

The most important features at a glance.

Transparency about the condition of your vehicles, from AdBlue to brake wear and tyre pressure.

Get to your destination faster with Live Traffic.

Dynamic route calculation for shorter driving times and a more predictable arrival using real-time traffic data.

New from 2024: FOTA.

Over-the-air updates always keep your vehicle software up to date – regardless of time and place.

New from 2024: S24h+.

Online breakdown notification with transmission of geoposition and diagnostic data for fast and professional breakdown assistance.
