All figures are based on a standard specification. The addition of factory options may affect CO₂ emissions and corresponding Road Fund Licence. The indicated values were determined according to the prescribed measurement method – Worldwide Harmonised Light Vehicle Test Procedure (WLTP). Figures shown may include options which are not available in the UK. Figures shown are for comparability purposes; only compare with other vans tested to the same technical procedures. Figures may not reflect real life driving results, which will depend upon a number of factors including factory-fitted options, accessories fitted (post registration), variations in weather, driving styles and vehicle load. Further information about the test used to establish fuel consumption and CO₂ figures can be found at <https://www.mercedes-benz.co.uk/vans/en/WLTP>

- Return it to us.

As a business customer, your vehicle can also appear as an asset on your balance sheet.
